

Hawker 900XP - PMA Engine Bypass Fairings

Hawker 900XP Engine Bypass Fairings are notorious for cracking. Unlike the standard OEM aluminum parts, **AVMATS Engine Bypass Fairings** are made from 321 annealed stainless steel and provide vastly more hours of operational service for a fraction of the cost.

Our **PMA design and production approved** fairings provide a durable replacement for the factory installed units located at the three, nine, and twelve o'clock positions encasing the engine bypass ducts.

AVMATS Parts Support is available 24/7. Put us to the test! Call +1 (636) 532-2674 and press 1 for Parts Sales or email us at parts@avmats.com.
